This background sets the stage for the variety of careers you can find in these settings.

Animal Care and Husbandry Positions

One of the most visible and beloved types of zoo and aquarium jobs AZA org promotes centers around direct animal care. These roles require a deep knowledge of animal behavior, biology, and welfare, and they often involve hands-on work with diverse species.

Animal Keeper

Animal keepers are the frontline caregivers for the animals in zoos and aquariums. Their responsibilities include feeding, cleaning habitats, monitoring health, and enriching the animals' environments to encourage natural behaviors. This role demands physical stamina, strong observational skills, and a genuine love for animals. Keepers often specialize in particular groups of animals—such as mammals, reptiles, birds, or aquatic species—depending on the institution's collection. They also collaborate closely with veterinarians and curators to ensure optimal care.

Veterinary Technician

Supporting the veterinary team, veterinary technicians assist in medical procedures, perform routine health checks, collect samples for testing, and maintain medical records. This role blends animal care with medical knowledge and requires formal education in veterinary technology. Veterinary technicians play a crucial role in preventive medicine and emergency care, contributing to the well-being and longevity of the animals under their care.

Animal Trainer and Behavior Specialist

Animal trainers use positive reinforcement techniques to encourage desired behaviors, which can aid in medical treatments, enrichment, and public demonstrations. Behavior specialists study animal actions to improve welfare and address issues like stress or aggression. These experts apply principles from animal psychology and ethology to enhance the quality of life for captive animals.

Conservation and Research Careers

AZA-accredited zoos and aquariums are deeply involved in wildlife conservation and scientific research. They participate in breeding programs, habitat preservation, and studies that help protect endangered species and ecosystems worldwide.

Conservation Biologist

Conservation biologists develop and implement strategies to protect species and their habitats. They often work on captive breeding programs designed to bolster populations of threatened animals. Their work can extend beyond the institution into field research and global collaboration. This role requires a strong background in biology, ecology, and environmental science, combined with a passion for solving conservation challenges.

Research Scientist

Research scientists conduct studies on animal behavior, genetics, nutrition, and more. Their findings help improve animal care protocols and inform conservation efforts. They often publish their work in scientific journals and present at conferences. Working in this position means contributing valuable knowledge that bridges the gap between captivity and the wild.

Education and Public Engagement Roles

Zoos and aquariums are not just places to see animals—they are centers for learning and inspiration. Education staff play a critical role in fostering public awareness about wildlife and environmental issues.

Education Specialist

Education specialists create and deliver programs for visitors of all ages, from school groups to families. They develop interactive exhibits, lead tours, and organize workshops that highlight conservation messages. Strong communication skills and a background in education, biology, or environmental studies are typical requirements for this position.

Public Relations and Marketing Coordinator

Promoting the zoo or aquarium’s mission and events is vital to its success. PR and marketing professionals craft campaigns that attract visitors, raise funds, and build community partnerships. These careers blend creativity with strategic planning and require knowledge of media relations and digital marketing.

Operations and Support Staff

Behind the scenes, numerous roles keep the zoo or aquarium running smoothly, ensuring a safe and welcoming environment for animals and guests alike.

Facilities Manager

Facilities managers oversee the maintenance and improvement of animal habitats, visitor areas, and technical systems like water filtration and climate control. Their work ensures that infrastructure supports both animal welfare and guest experience. Technical expertise in engineering, construction, or environmental systems is essential here.

Guest Services and Membership Coordinator
