Stages of Human Development

Hurlock identified specific stages of development, each characterized by distinct psychological and physical features. Her stages included infancy, childhood, adolescence, adulthood, and old age, with detailed descriptions of the typical challenges and milestones associated with each. Pros: - Provides a clear framework for understanding human growth. - Useful for practitioners to identify typical vs. atypical development. Cons: - May oversimplify complex individual differences. - Stages can sometimes appear rigid, not accounting for variability.
