When a user inputs desired data: Personal details (name, address) Account number Statement period Transaction details The software populates the template with this information, aligning amounts, dates, and descriptions to ensure visual coherence.

Image Rendering and PDF Generation

Once data is entered, the generator renders the populated template into high-resolution images or PDFs. This process involves: Applying fonts and styling to match real banks Embedding logos and security features (if applicable) Ensuring the layout mirrors official statements The output can then be downloaded or shared as needed. --

Legality and Ethical Considerations
