Understanding the Basics: What is Mass Communication?

Mass communication refers to the process by which individuals, groups, or organizations relay information to large segments of the population through mass media channels. These channels include television, radio, newspapers, the internet, and social media platforms. Unlike interpersonal communication, mass communication is designed to reach vast audiences simultaneously, influencing public opinion, culture, and even political landscapes. At its core, mass communication involves several key components: - **Sender**: The originator of the message, such as a news outlet or content creator. - **Message**: The information or content being shared. - **Medium**: The platform or channel used to deliver the message. - **Receiver**: The audience consuming the content. - **Feedback**: The response from the audience, which may be immediate or delayed. Understanding these elements helps decode how media messages are crafted and disseminated, a topic Baran’s work extensively covers.
