- **Reason:** Enlightenment thinkers believed human reason could solve social, political, and scientific problems.

- **Skepticism of Authority:** Questioning the divine right of kings and traditional institutions like the church.

Key Figures Highlighted in Guided Activity 17 2

One of the most common tasks in guided activity 17 2 involves identifying and explaining the contributions of major Enlightenment thinkers. Here's a breakdown of important philosophers and their ideas that often come up:

John Locke: The Father of Liberalism

John Locke's theories on natural rights — life, liberty, and property — became foundational for Enlightenment political thought. His belief that governments should protect these rights and be based on the consent of the governed directly influenced democratic principles. In your answers, emphasize Locke's argument that people have the right to overthrow a government that fails to protect their rights.

Voltaire: Champion of Freedom of Expression

Voltaire was known for his wit and advocacy for civil liberties, especially freedom of speech and religion. His critiques of tyranny and organized religion made him a controversial figure but also a hero of Enlightenment ideals. When addressing questions about Voltaire, highlight his role in promoting tolerance and reason.

Montesquieu: The Separation of Powers

Montesquieu's concept of dividing government authority into different branches to prevent tyranny was revolutionary. This idea heavily influenced the structure of modern democracies, including the United States Constitution. If your guided activity asks about government reforms, Montesquieu's work is a key point to discuss.

Rousseau: The Social Contract

Jean-Jacques Rousseau introduced the idea that governments are formed by a social contract in which people agree to be governed for the common good. His belief in popular sovereignty and general will challenged absolute monarchy and inspired later democratic movements. When answering questions related to government legitimacy, Rousseau's theories are essential.
