Investigating the Cause of Death Lester Sumrall passed away on March 22, 1996, at the age of 82. The direct cause of Lester Sumrall's death was reported as complications related to natural causes, primarily attributed to his advanced age and health deterioration. Available records and biographies do not cite any sudden or traumatic illness; instead, they indicate a gradual decline in health, consistent with many elderly individuals. Sumrall's death was peaceful and occurred in a setting surrounded by family and close associates, reflecting the respect and affection he garnered over his lifetime. While the exact medical details remain private, it is widely accepted that no extraordinary medical condition, such as cancer or heart attack, was publicly disclosed as the cause of his passing. ### Health Challenges in Later Years As with many figures of his generation, Lester Sumrall faced typical age-related health issues. Chronic illnesses such as hypertension, arthritis, or other degenerative conditions are common among individuals in their eighties. Although specific ailments were not publicly documented, it is reasonable to infer that such factors contributed to his eventual demise. The lack of detailed medical information highlights a common practice among prominent religious
