Understanding the Journal of Pharmacology and Experimental Therapeutics Impact Factor 2017

The impact factor is a metric that measures the average number of citations received per paper published in a journal during the preceding two years. For the JPET, the impact factor in 2017 reflected how influential the journal's publications were within the scientific community during that period. JPET has long been a respected journal in the pharmacological sciences, publishing high-quality research on drug action, experimental therapeutics, and pharmacodynamics. The 2017 impact factor serves as a snapshot of its standing among peer journals in pharmacology and related biomedical disciplines.

What Was the Impact Factor in 2017?

In 2017, the Journal of Pharmacology and Experimental Therapeutics had an impact factor that hovered around the mid-to-high range for pharmacology journals. While exact numbers can vary slightly depending on databases and reporting, the 2017 impact factor was approximately 3.3 to 3.5. This placed JPET comfortably among leading journals in experimental and clinical pharmacology. This score indicates that, on average, articles published in JPET in 2015 and 2016 were cited roughly 3.3 to 3.5 times in

2017. Such a citation frequency underscores the journal's role in disseminating influential research that shapes the field.

Why Does the Impact Factor Matter for JPET?

The impact factor often serves as a proxy for a journal's prestige and influence in its field. For researchers, publishing in a journal with a respectable impact factor like JPET's 2017 rating means their work is more likely to be widely read, cited, and recognized.

Influence on Researchers and Authors

Many scientists consider the impact factor when deciding where to submit manuscripts. A higher impact factor can translate into greater visibility and career advancement opportunities. For early-career pharmacologists, publishing in JPET during the 2017 period offered a platform that balanced rigorous peer review with a strong readership.

Understanding the Journal of Pharmacology and Experimental Therapeutics

The Journal of Pharmacology and Experimental Therapeutics (JPET) is a peer-reviewed publication that has been a cornerstone for disseminating significant

research findings in pharmacology since its inception. It publishes original research articles, reviews, and commentaries focusing on the mechanisms of drug action, pharmacodynamics, pharmacokinetics, and the molecular basis of therapeutic interventions. By 2017, JPET had established itself as a reputable source for researchers and clinicians interested in experimental therapeutics and pharmacological innovations. The journal's content spans a broad spectrum, including preclinical studies, experimental drug development, and toxicological evaluations, which makes it a valuable repository for cutting-edge scientific information.

Journal of Pharmacology and Experimental Therapeutics Impact Factor 2017: What Does It Signify?

The impact factor (IF) is a quantitative measure reflecting the average number of citations to articles published in a journal during the previous two years. Specifically, the JPET impact factor in 2017 measures citations received in 2017 to articles published in 2015 and 2016. This metric is often employed to evaluate a journal's relative importance within its field. In 2017, the Journal of Pharmacology and Experimental Therapeutics had an impact factor of approximately 3.5. This figure denotes a moderate to high

© 172.104.240.182

level of influence, indicating that the research published within JPET was widely cited and considered relevant by the scientific community. For comparison, similar journals in pharmacology, such as Pharmacological Reviews or the British Journal of Pharmacology, typically report higher or lower impact factors depending on their scope and focus.

Factors Influencing the 2017 Impact Factor

Several factors contributed to JPET's impact factor in 2017:

1. **Quality of Published Research:** JPET's rigorous peer-review standards ensure that only high-quality experimental studies with robust methodologies are published, which naturally attracts citations.
2. **Scope and Audience:** Its broad coverage of pharmacological mechanisms and experimental therapeutics appeals to a diverse readership including pharmacologists, toxicologists, and clinical researchers.
3. **Timeliness and Relevance:** The journal emphasizes translational research linking basic pharmacology to clinical applications, increasing the likelihood that its articles influence ongoing studies.
4. **Publication Frequency:** JPET publishes numerous issues annually, allowing a steady flow of new content that can be cited.

Comparing JPET’s 2017 Impact Factor to Other Journals

When analyzing the Journal of Pharmacology and Experimental Therapeutics impact factor 2017, it is instructive to benchmark it against peer journals in pharmacology and experimental medicine:

1. **Pharmacological Reviews:** Known for comprehensive reviews, this journal often boasts impact factors exceeding 10, reflecting its role in summarizing and influencing research trends.
2. **British Journal of Pharmacology:** With a 2017 impact factor around 6, this journal covers a wide range of pharmacological topics, slightly more general than JPET.
3. **European Journal of Pharmacology:** Typically with impact factors near 3, similar to JPET, this journal also focuses on experimental pharmacology but with a more European-centric author base.

JPET’s impact factor of approximately 3.5 situates it solidly in the mid-tier range, indicating a strong presence but not quite at the pinnacle of the field. This is consistent with its focus on original experimental research rather than broad reviews, which tend to attract higher citation counts.

Implications for Authors and Researchers

For researchers deciding where to submit their work, the journal of pharmacology and experimental therapeutics impact factor 2017 provides essential context. An impact factor in the mid-3 range means that articles published in JPET are likely to reach a substantial audience and receive respectable citation counts. This can enhance the visibility and academic recognition of research findings. Moreover, the journal's reputation for publishing rigorous experimental studies ensures that authors contribute to a credible and influential platform. However, researchers aiming for the highest citation impact might also consider journals with higher impact factors, depending on their specific study focus and audience.

Broader Context: Evolution of Impact Factors and JPET's Role

While the 2017 impact factor offers a snapshot, it is important to recognize that journal metrics fluctuate over time. JPET's impact factor has experienced gradual changes influenced by shifts in research trends, publication policies, and citation behaviors. The journal's steady emphasis on mechanistic pharmacology and experimental therapeutics has maintained its relevance amid the growing interest in translational medicine.

Furthermore, JPET supports open access options and digital dissemination, which can enhance article visibility and potentially influence future impact metrics.

Strengths and Limitations of the Impact Factor Metric

Understanding the journal of pharmacology and experimental therapeutics impact factor 2017 also requires acknowledging the broader debate surrounding impact factors:

1. **Strengths:** Impact factors provide a standardized, quantifiable measure of a journal's citation influence and help researchers gauge where to publish or find authoritative content.
2. **Limitations:** The metric does not account for article quality on an individual basis, nor does it reflect the real-world clinical impact of research. It can also be skewed by a few highly cited articles.

Therefore, while the 2017 impact factor indicates JPET's respectable status, researchers and institutions are encouraged to consider other qualitative and quantitative measures when evaluating journals.
