The numeracy test evaluates your ability to work confidently with numbers, which is critical in healthcare roles. Tasks often include: - Basic arithmetic (addition, subtraction, multiplication, division) - Working with decimals and fractions - Understanding percentages - Interpreting data from tables and charts - Dosage calculations and measurements For example, you might be asked to calculate the correct medication dose based on a patient’s weight or interpret a patient’s vital signs from a chart.

What Is Tested in the Literacy Assessment?
